LME Nickel – steps we've taken since March

We would like to update you on some of the steps we've taken to restore confidence and build resilience in our market following the nickel market suspension in March.

As you may be aware, on 16 March, we put in place several interim measures to ensure an orderly resumption of nickel trading, including:

- the application of 15% daily upper and lower price limits
- improved visibility of both on-exchange and OTC client positions in nickel.

Since then, we have committed to introduce a weekly OTC position reporting framework for all LME physically delivered metals. The reporting framework – which will come into effect on 5 September – will enhance our visibility of OTC markets and, therefore, improve our ability to oversee activity holistically for the benefit of the market as a whole.

LME Nickel – Independent review, market engagement

Independent consultants Oliver Wyman are seeking feedback from key stakeholders and interested parties as part of an independent review they are conducting into events in the nickel market leading up to the suspension in March 2022.

LME Annual Dinner 2022 - guest speaker announced

As the build-up to LME Week in October continues, we're delighted to announce that that keynote speaker at the LME Annual Dinner will be Admiral William H. McRaven. Admiral McRaven is a retired U.S. Navy Four-Star admiral and the former

Chancellor of the University of Texas System.

Cash-settled futures – video series

The LME is well known for its physically settled suite of non-ferrous metals contracts, and we recently added a range of EV metals, ferrous and aluminium-related contracts to our cash-settled futures (CSFs) offering.

In the third of our video series, we look at how the ferrous and EV communities can hedge their price risk using CSFs.

Responsible sourcing update

The LME's responsible sourcing programme reached its first deadline on 30 June 2022. Over 90% of all LME-listed brand producers submitted the required information relating to how they are implementing the OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas at their sites.

We are encouraged by the level of engagement from our brand producers in this process and look forward to sharing more updates during LME Week.
